# SI664 Project Proposal

## Team Member:

Qi Zhou([zqcarlos@umich.edu](mailto:zqcarlos@umich.edu))

Yutong Liu(yutongl@umich.edu)

## Project Proposal:

The team plans to do the project which bases on the dataset from

Kaggle(https://www.kaggle.com/karangadiya/fifa19). This dataset has aggregate 89

columns that descript details in FIFA2019. The team plans to choose suitable

columns that can meet the one to many and many to many relationships to use.

And for the website interactive part, we will offer the users not only valid data but

also interactive visualization which can help them understand the FIFA2019 more

detailed.

The website will offer following function:

1. Data view

2. Data edit

3. Data interactive visualization

4. Basic functions (such as Login and Log out)
